EDUCATION

PDPM Indian Institute of Information Technology Design and Manufacturing Jabalpur, India (Jul 2018 - Aug 2022)
Bachelor of Technology in Mechanical Engineering (GPA: 7.8/10.0)

The Coding School (Jul 2020 - Aug 2021)
Quantum Computing

EXPERIENCE

MethodWorks Pvt. Ltd. May 2023 – Dec 2025
Full-Stack Developer Noida, India

- Developed end-to-end enterprise-grade features using **ReactJS** for front-end and **Golang** for back-end, following scalable and maintainable system design principles.
- Designed and implemented secure, high-performance **RESTful APIs** with emphasis on **concurrency handling in Golang** and efficient request processing.
- Utilized **cryptography best practices** and **decentralized identity (DID)** concepts for secure authentication, authorization, and data integrity.
- Implemented **Module Federation** using the **Nx Framework** to enable scalable micro-frontend architecture and independent feature deployments.
- Built and maintained an **Enterprise Admin Console** supporting role-based access control, monitoring, and system configuration.
- Managed **MySQL** and **MongoDB** databases, optimizing queries and ensuring consistency, reliability, and data integrity.
- Deployed and maintained applications on **Google Cloud Platform (GCP)** using App Engine, focusing on scalability and fault tolerance.
- Ensured non-functional requirements such as **security, scalability, reliability, performance, and manageability** across all services.
- Collaborated with cross-functional teams to deliver high-quality features on time, improving overall system robustness and delivery efficiency.

Gao Tek Inc. (Jan 2023 - Apr 2023)
Software Development Intern, Internship Bangalore, India

- Understanding demands and requests from clients and points discussion with senior developers and other interns.
- Doing research on different requirements or modules using different environments and IDEs which best suits our needs.
- Debugging existing code base and integrating APIs, Buffer, Hardware Driver, and Modem together in a library.

PROJECTS

URL Shortener Application (Jul 2022 - Aug 2022)
Self Project [Github](#)

- Developed a URL shortening application using **Go (Golang)** and the **Gin** web framework, enabling conversion of long URLs into concise, shareable links.
- Utilized **Google Cloud Datastore** for efficient storage and **Redis** for caching, ensuring quick redirection and high performance.
- Deployed the application on **Google App Engine**, ensuring scalability and reliability.
- Applications include simplifying URL sharing, social media integration, and analytics tracking for link usage.

Heart Disease Monitoring System (Jan 2021 - Apr 2021)
Prof. Kusum Kumar Bharti, IIITDM Jabalpur [Github](#)

- Analyze real-life data and parse for useful information and applying different **Machine Learning Algorithms**.
- ML algorithms used are **Logistic Regression, Naive Bayes, SVM, K-NN, Decision Tree, Random Forest, Neural Networks**.
- Application in finding most relevant heart disease associated with existing symptoms with maximum efficiency.

TECHNICAL SKILLS

Programming Languages: Golang, C++, JavaScript, Python
Front-End Technologies: HTML, CSS, JavaScript, ReactJS
Databases: MySQL, MongoDB, Neo4j
AI / LLM Technologies: ChatGPT, Gemini, Claude, DeepSeek
ML / Data Science: NumPy, Matplotlib, Scikit-learn, Keras

AI IDEs & Dev Tools: Cursor, Windsurf, Kiro, Warp
Back-End Technologies: NodeJS, ExpressJS, Gin
APIs: RESTful, GraphQL
Cloud Platforms: Google Cloud Platform (GCP), AWS

SOFT SKILLS

Interpersonal: Communication, Decision Making, Team Work
Situational: Adaptability, Problem Solving, Negotiation
Personal: Responsibility, Punctuality, Innovation
